Reissue Applications

Claims 36-41 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. Although this application is a reissue application of 09/021,617, it is brought to Applicant's attention that the now claimed subject matter is merely a broadened version of patented claims 1-17 in US Patent 5,832,969. In comparing the claims patented in 5,832,969 to the reissue application claims, the claims essentially differ by omitting at least limitations drawn to *the hydraulic motor*. Accordingly, a claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

Response to Arguments

Applicant's arguments filed 8-16-04 have been fully considered but they are not persuasive. In support of applicant's argument that Examiner can only apply the patent surrendered in the filing of the current reissue application under 35 USC 251, since the term "original" means only the surrendered patent and not other patents in the genealogy or chain of pendency, Applicant most importantly cites *United States Filter Corporation et al. v. Ionics Corporation*, 68 F.Supp2d 48 . From this citation applicant concludes that Examiner can only consider the original patent to be the patent being corrected by reissue (particularly this conclusion is extracted from page 20, col. 1, lines 20-22 of the cited case). Examiner disagrees

Art Unit: 3751

with applicant in that the current citation deals primarily with the doctrine of recapture and not the definition of "original". Accordingly, Examiner finds the citation non-analogous and ultimately unconvincing.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

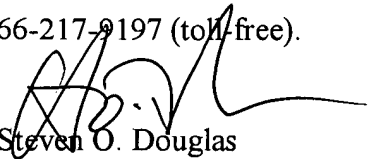

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
